

sinclair uses the public airwaves free of charge, and is obligated by law to serve the public interest. I understand the use of free speech and you can choose to turn off the television and not watch it etc...

So I guess in the end go for it. I just wish that we spent all the money and hype on the issues that really matter in the end.

1084 and counting persons have died in Iraq. who stopped the press and people from seeing the caskets coming home? who snitized this war to fit into my evening news? REMEMBER VIET NAM. It was gruesome and you had to turn away from the TV. Is that not happening in Iraq? All is well and the war is clean? Somebody is trampling on freedoms here and that is what should be worked on.

Sure I am upset the the Kerry Documentary might/is going to be aired. Unfortunately our lives are not fair and we can't have it both ways.

Take care and try working on the things that matter. I really didn't care about Janet's boob or Howard Stern's comments but, I do care about the conservative high and mighty imposing on my day. Are you confused yet?
